

SUMMARY

Acknowledgments.....	1
----------------------	---

CHAPTER 1 - Introduction

OVERVIEW OF NANOSCIENCE AND NANOMATERIALS	3
<i>AgNPs characterization</i>	7
<i>Environmental fate of silver nanoparticles</i>	8
<i>Environmental exposure of silver nanoparticles</i>	11
<i>NPs in the marine environment</i>	12
ECOTOXICOLOGY	14
<i>Methodological approach for NPs toxicity testing</i>	15
<i>AgNPs ecotoxicity and mechanisms</i>	16
EFFECTS ON MARIN ORGANISMS.....	17
<i>Bivalve molluscs: a target groups for nanoparticles toxicity</i>	19
<i>Test organism Mytilus galloprovincialis</i>	21
AIM AND OUTLINE OF THE THESIS	22

CHAPTER 2 - Ecotoxicological effects of silver nanoparticles in marine mussels

INTRODUCTION	24
MATERIALS AND METHODS.....	26
<i>Preparation of artificial seawater (salinity 35‰)</i>	26
<i>Animals collection and acclimatization</i>	27
<i>Chemicals</i>	27
<i>Experimental design</i>	27
<i>96-h acute toxicity test – mortality in water</i>	28
<i>Semi-chronic toxicity test – mortality under aerial exposure</i>	28
<i>96-h chronic toxicity test – byssogenesis</i>	29
<i>Determination of silver concentration in water</i>	29
<i>Determination of silver concentration in mussel tissues</i>	29
<i>Statistical analysis</i>	30

RESULTS AND DISCUSSION	30
<i>96-h acute toxicity test – mortality in water</i>	30
<i>Sub-chronic toxicity test - mortality under aerial conditions</i>	31
<i>96-h chronic toxicity test – byssogenesis</i>	33
<i>Bioaccumulation of silver in mussel body burden</i>	34
<i>Persistence of AgENPs in seawater: development of a logistic model to compute the actual Ag dose</i>	35

CHAPTER 3 - Ecophysiological effects. Bio-energetics measurements in long-term exposure

INTRODUCTION	43
MATERIAL AND METHODS	45
<i>Chemicals</i>	45
<i>Animals collection and acclimatization</i>	45
<i>Experimental design</i>	46
<i>Mortality in water</i>	47
<i>Clearance rate (CR)</i>	47
<i>Respiration rate (RR)</i>	48
<i>Heart beat rate (HBR)</i>	48
<i>Absorption efficiency (AE)</i>	49
<i>Biometrical, gravimetical and mussel dry weight measurements</i>	49
<i>Statistical analysis</i>	50
RESULTS AND DISCUSSION	50
<i>Mortality</i>	50
<i>Ecophysiological parameters</i>	50
ECOPHYSIOLOGICAL EFFECTS OF AgENP IN THE ALLOCHTONOUS MUSSEL <i>Brachidontes pharaonis</i>	56

CHAPTER 4 - Mechanistic effects of AgENPs

INTRODUCTION	62
MATERIALS AND METHODS	71
<i>Animals and treatments</i>	71

<i>RNA extraction</i>	71
<i>Reverse transcriptase-polymerase chain reaction (RT-PCR)</i>	71
<i>Determination of silver concentration in mussel tissues</i>	72
<i>Determination of soluble silver concentration in water</i>	72
<i>Real Time quantitative Reverse Transcription PCR (Real-time qRT-PCR)</i>	73
<i>Protein extraction and 2-DE gel electrophoresis</i>	75
<i>2-DE Western blotting and carbonyls detection</i>	75
RESULTS	77
<i>Gene expression study: short term effects</i>	77
<i>Molecular adaptive response to Ag ENP</i>	82
<i>Biochemical effects of AgENPs</i>	89

CHAPTER 5 - Study of silver nanoparticle effect at ecological level: DEB approach

INTRODUCTION	98
EXPERIMENTAL DESIGN AND MATHATERIALS AND METHODS.....	100
<i>Phase I:</i>	100
<i>Phase II:</i>	102
<i>Phase III.</i>	103
<i>Clearance rates</i>	104
<i>Food absorption efficiency</i>	104
<i>Biometrical, gravimetrical and mussel dry weight measurements.</i>	105
<i>Statistical analysis. An analysis of variance</i>	106
RESULTS	107

CHAPTER 6 - CONCLUSIONS.....110

APPENDIX I

PRIMARY CHARACTERIZATION OF NANOPARTICLES	114
INTERACTION OF NANOPARTICLES WITH ARTIFICIAL SEAWATER	116

APPENDIX II

LOCALIZATION OF NANOPARTICLES AND NANO-IMAGING117

REFERENCES.....120
